

testimonials

“

I have used Feldt Constructions for several construction projects and have never been disappointed with the quality, cost or schedule of the projects they have delivered. I have found that Feldt Constructions co-ordinates and cooperates well with other contractors with a focus to ensuring the best outcome for the project. I will certainly consider using Feldt Constructions for any future concreting projects.

”

Regards,

John Murray
Orana Engineering

“

Feldt Constructions have been providing concrete construction services to our company; and our customers in the petroleum industry for over 17 years.

John and his team of experts provide quality construction services within deadlines, and they always work within the required safety and quality procedures.

Their ability to provide innovative solutions over a range of construction problems makes them a valued supplier of ours.

CONSTRUCTIONS

Concreting Experts for Industry

Feldt Constructions Pty Ltd is a family owned and operated business, which was founded in 1993 by John & Julie Feldt. Since its' inception the company has developed into a specialist, business to business supplier, of quality concrete construction services.

John Feldt, the director of Feldt Constructions Pty Ltd, is a registered builder and trade qualified bricklayer and has worked in the local construction industry since 1977. John's role is Construction Manager and he is responsible for the overall site management of the Construction, Concrete Pump and Plant Hire divisions. John has been a member of the Master Builders Queensland for over 20 years. Julie Feldt as Business Manager, is responsible for the quality, safety, human resources and financial management of the company, and holds a Masters in Business Administration.

Feldt Constructions is committed to providing creative and dynamic construction services and endeavour to foster a working environment which enables staff to excel and customers to prosper. The stable long standing staff have the skills & experience to provide a safe, efficient and quality service to customers.

The company's services are used on a wide range of infrastructure projects for local authorities and providing maintenance and capital works to many large businesses in the North Queensland area. Feldt Constructions have provided construction and hire services on local road and storm water projects, parks and gardens installations and entrance statement signs. Other projects for industry include retaining walls, large open drains, kerb & channel installations and commercial car parks.

Feldt Constructions pride themselves on being able to work with businesses to provide innovative and flexible concrete construction solutions to the industrial, infrastructure and commercial sectors.

industries serviced

Feldt Constructions provides services to a wide range of customers including infrastructure works such as entrance statement signs, stormwater pits, culverts, pedestrian bridges and pathways. In the industrial and mining sectors they are skilled in concrete pedestals, tank beams and bases, bunded areas, ring beams and hardstands. Customers of Feldt Constructions value their ability to upgrade and maintain their existing production facilities.

company resources and capabilities

The team at Feldt Constructions are long serving employees with a wide range of construction skills. The team prides themselves on being able to partner with customers to provide flexible solutions to a wide variety of construction challenges. In every case, Feldt Constructions aim to deliver on time, every time and are committed to the company culture of giving exceptional customer service. This is possible because they have the resources to provide all types of concrete services including, excavation, concrete pumping and shotcrete in house, enabling the team to deliver and control projects, without delays caused from outsourcing.
